TOOLS/METHODOLOGIES

Agile, AJAX, Angular, BitBucket, Bootstrap, ColdFusion, CSS, Flexbox, GIT, HTML, JavaScript, jQuery, JIRA, JSON, PHP, SASS, SourceTree, WordPress

EDUCATION

BA in Sociology & Speech/Communication, Minnesota State University
Graduated Magna Cum Laude

CERTIFICATIONS

American Mensa, Member

Google:
IT Support
Crash Course on Python

Skillcrush:
Front End Development + React

freeCodeCamp:
Responsive Web Design
JavaScript Algorithms and Data Structures

CANDIDATE SUMMARY

UI/UX developer of websites and web-based applications.

Proficient in HTML/CSS and more, adaptive to new tools and technologies. Productive, resourceful, collaborative.

DEMONSTRATED SKILLS

- Manipulate DOM with Angular, JavaScript, and jQuery
- Build rich, interactive components guided by end-user stories and wireframes
- Retrieve and interpolate database objects

EXPERIENCE HIGHLIGHTS

- Played a key role in the design and build of three enterprise-scale, web-based applications
- Experience with PHP and frameworks including Cake, Yii, and Zend
- I do the heavy lifting when it comes to tracking and fixing bugs. I am a resourceful problem solver.
- 3 years experience with Agile methods including sprint planning, backlog grooming, and velocity assessment

PROJECT EXPERIENCE

Freelance Consultant

May 2017 to Present

BowenUX, Boston (remote)
Bryant Consulting, Texas (remote)
Concord Consulting, Hopkins (Anthem Insurance)
GoKart Labs, Minneapolis
The Guerrilla Agency, Minneapolis
Yamamoto Marketing, Minneapolis

- Build accessible forms and UI components with client-side tools such as JavaScript, Angular
- Build pixel-perfect websites from Wireframes, Illustrator, Photoshop, Sketch
- Ensure responsive and adaptive experience with Bootstrap, Flexbox
- Collaborate with all stakeholders to deliver product on a deadline
- Successfully execute multiple projects simultaneously
- Comply with WCAG standards 2.0
- Maintain strict version control with BitBucket, GIT, and GITHUB
- Efficient development and deployment with build tools like Gulp, Yarn, Docker, etc.

ANGULAR, BITBUCKET, BOOTSTRAP, CSS, DOCKER, FLEXBOX, GIMP, GIT, GITHUB, GULP, HANDLEBARS, HTML, ILLUSTRATOR, JAVASCRIPT, JIRA, JQUERY, MYSQL, PANTHEON, PHOTOSHOP, SKETCH, SLACK, SOURCETREE, WORDPRESS, YARN

Full-stack Developer

The Lacek Group, Minneapolis

May 2016 to May 2017

- Built UI for dynamic, web-based application with JavaScript, jQuery, and PHP
- Participated in Agile process including sprint planning and backlog grooming
- Logged and tracked bugs, tasks, and hot fixes with JIRA
- Resolved bugs in all areas of the application
- Maintained strict version control with GIT and Atlassian Tools
- Managed code deployment through the environment hierarchy

BITBUCKET, CSS, FLEXBOX, GIT, HTML, JAVASCRIPT, JIRA, JQUERY, MYSQL, PHP, SLACK, SOURCETREE

Valleyfair!, Shakopee

December 2015 to May 2016

- Restructured complex relational database in MS Access for migration to SQL server
- Built new, web-based user interface
- Wrote server-side model and controller functions for data aggregation
- Gathered input from users on desired functions and features
- Wrote year-end processing functions and guidelines
- Deployed application to web server and trained users on record entry and report generation

CSS, HTML, JAVASCRIPT, JQUERY, MS ACCESS, PHP, SQL, YII

KiOui Apps, Minneapolis

August 2014 to August 2015

- Built a web-based application that utilizes Amazon MWS (Merchant Web Service) API. It monitors the competition then adjusts retail prices according to user-defined targets. I was responsible for designing and building all of the UI and REST API
- Designed and built efficient, user-friendly UI for the creation and maintenance of large product inventories.

CAKEPHP, CSS, HTML, MYSQL, PHP, JAVASCRIPT, JQUERY
